DEMO · Synthetic data. Orrery Payments and Demo Bank are fictional — no real people, accounts or transactions. Resets daily around 03:00 UTC.

Reconcile

Three sources. One reconciled month.

Matches the internal ledger, the processor's settlement report and the bank statement — and puts only the genuine differences in front of a person. Any past run can be recomputed byte for byte.

Internal ledger	653 rows
Orrery settlement report	612 lines · 30 payouts
Demo Bank · camt.053	67 entries

✓ **65 matches · 7 exceptions** September 2026 · replay identical

Planted problems

Five errors deliberately seeded into the demo month

5 of 5 caught

P1 **Missing payout** — missing_from_bank
PO-20260914 · EUR 1,752.23 settled, never reached the bank

P2 **Fee mismatch** — amount_mismatch
PO-20260913 · bank received EUR 0.40 less than the net payout

P3 **50-to-1 batch deposit** — many_to_one match
PO-20260916 · 50 payments paid out as one EUR 10,624.87 credit

P4 **Duplicate ledger entry** — possible_duplicate
PAY-000520 · EUR 371.21 booked twice (LE-000526, LE-000527)

P5 **Deposit nobody expected** — unknown_deposit
EUR 250.00 on 2026-09-22 · no counterpart anywhere

Expected timing differences

Not errors — money that lands after the period closes

T1 **PO-20260929** — timing
Payout dated 1 Oct

T2 **PO-20260930** — timing
Payout dated 2 Oct

T3 **PAY-000625** — timing
Booked 30 Sep, reaches the bank in October

```

The engine is a pure function of the stored files and its version: no clock, database, randomness or locale.

Inputs

Ledger · file #1	synthetic_ledger_2026-09.csv	653 rows
Settlement · file #2	synthetic_orrery_settlement_2026-09.csv	612 lines
Bank · file #3	synthetic_bank_camt053_2026-09.xml	67 entries

The database re-checked the arithmetic of every match before accepting this run as finished.

DEMO · Synthetic data. Orrery Payments and Demo Bank are fictional — no real people, accounts or transactions. Resets daily around 03:00 UTC.

RUN #1 · SEPTEMBER 2026

Exceptions queue

Only the genuine differences between ledger, settlement and bank. Each one needs a reason code and a written note to close.

EUR 2,373.84
value under review (P1, P2, P4, P5)

All open 7 | Needs review 4 | Timing 3 | Resolved 0

ID	Reason	What happened	Reference	Amount (EUR)	Status
#1	missing_from_bank	**Payout never reached the bank** In the settlement report, absent from the statement · 9 ledger + 9 settlement rows	PO-20260914	1,752.23	Open
#2	amount_mismatch	**Bank received EUR 0.40 less** Net payout 312.16 settled, 311.76 credited · 3 rows	PO-20260913	0.40	Open
#3	possible_duplicate	**Ledger entry booked twice** LE-000526 matched; LE-000527 has no counterpart	LE-000527 · PAY-000520	371.21	Open
#4	unknown_deposit	**Deposit nobody expected** Credit on 2026-09-22 · “SYNTHETIC UNREFERENCED TRANSFER”	Bank entry	250.00	Open
#5	timing	**Payout dated after period end** Card payments of 29 Sep, paid out 1 Oct	PO-20260929	–	Open
#6	timing	**Payout dated after period end** Card payments of 30 Sep, paid out 2 Oct	PO-20260930	–	Open
#7	timing	**Transfer arrives next month** Booked in the ledger 30 Sep, reaches the bank in October	PAY-000625	–	Open

Resolutions are append-only: a correction supersedes the resolution in force and the full history stays visible. If two people act on the same exception at once, exactly one gets through and the other is told who got there first.

DEMO · Synthetic data. Orrery Payments and Demo Bank are fictional — no real people, accounts or transactions. Resets daily around 03:00 UTC.

amount_mismatch Open

The bank received EUR 0.40 less than Orrery settled

Payout PO-20260913 · single card payment · raised by run #1 on 2026-10-10 09:51:06 UTC

Evidence

3 rows, one from each source

INTERNAL LEDGER		ORRERY SETTLEMENT		DEMO BANK STATEMENT	
Card payment	316.85	Gross	316.85	Credit	311.76
		Stated fee	−4.69		
316.85		**312.16**		**311.76**	
gross, EUR		net payout, EUR		received, EUR	

Why it doesn't reconcile

Expected at bank		Received		Shortfall
312.16	−	311.76	=	EUR 0.40

✓ The stated fee is correct: 1.4% of 316.85 = 4.44, plus the EUR 0.25 fixed fee = 4.69. So the fee does not explain the gap — something between Orrery and the bank does.

History

- **Raised as amount_mismatch**

Upload and reconcile

Add the month's three files, then queue a reconciliation. The worker parses and matches in the background.

1 Upload a file

What kind of file?

- **Ledger** — CSV
- **Settlement** — Orrery CSV
- **Bank statement** — camt.053 XML

Drop your ledger CSV here, or browse

Internal ledger export · .csv

Upload ledger

Identical bytes are recognised by SHA-256 and stored once. A file the parser rejects is kept as evidence but can never be used in a run.

2 Request a reconciliation

Ledger

#1 · synthetic_ledger_2026-09.csv · 653 rows

Settlement

#2 · synthetic_orrery_settlement_2026-09.csv · 612 lines

Bank statement

#3 · synthetic_bank_camt053_2026-09.xml · 67 entries

Only parsed files are offered.

Queue reconciliation

WAITING FOR THE WORKER

DEMO · Synthetic data. Orrery Payments and Demo Bank are fictional — no real people, accounts or transactions. Resets daily around 03:00 UTC.

Jobs

Parsing, reconciliation and replay all run as jobs on the worker. Every attempt and error is kept.

Total	Queued	Running	Failed	Done
5	0	0	0	5

All jobs

Newest first

Job	Kind	Target	Result	Status	Attempts	Requested by	Queued (UTC)	Action
#5	Replay	Run #1	Run #2 · identical	Done	1	Deployment seed	2026-10-10 09:51	—
#4	Reconcile	Files #1 · #2 · #3	Run #1 · 65 matches, 7 exceptions	Done	1	Deployment seed	2026-10-10 09:51	—
#3	Parse	File #3 · bank	67 entries	Done	1	Deployment seed	2026-10-10 09:51	—
#2	Parse	File #2 · settlement	612 lines	Done	1	Deployment seed	2026-10-10 09:51	—
#1	Parse	File #1 · ledger	653 rows	Done	1	Deployment seed	2026-10-10 09:51	—

Failed jobs can be requeued by a controller. Requeueing is idempotent and never resets a job's attempt count.
